PROFESSIONAL SUMMARY

Highly motivated and detail-oriented computer science student with experience in AI/ML projects, seeking a Trainee AI/ML Engineer role to apply skills in LLMs, NLP, and semantic search. Proficient in Python, FastAPI, and various AI/ML tools. Strong foundation in software engineering principles and best practices.

SKILLS

Python LLM APIs OpenAI API Streamlit LLM Integration

PROJECTS

Syntexa - Text Similarity Analyzer

- Built a text similarity analyzer using C++ and data structures, achieving 85% accuracy on 50+ test document pairs
- Designed phrase comparison using sliding window technique, reducing false positives by 40%

Smart Agriculture Monitoring System

- Developed a full-stack farm monitoring dashboard with a MySQL schema, visualizing soil moisture, rainfall trends, and temperature correlations for irrigation insights
- Processed 1000+ sensor records using Pandas and NumPy, reducing analysis time from 2 hours to 5 minutes

EDUCATION

The University of Lahore

BS Computer Science
